

WeakRisk
Sport Solutions

The future of football
for the football of the
future

Inadequate performance analysis and poor communication among club staff prevent the achievement of set objectives..

The tools for monitoring and analysing performance data, which are essential for understanding the factors that influence sporting results, are inadequate.

Poor communication between club staff makes synergies difficult.

Today's pace of training and matches requires tools to monitor workloads, improve player performance and prevent injuries.

Data on youth teams is not collected, even though this information is essential for assessing player development and making targeted decisions.

Scouting is a vital resource that is often not properly developed.

There is a lack of track records on medical data, injuries and rehabilitation treatments.

A multi-platform cloud-based system (web app and mobile app) is our ideal solution.

Automates data collection in a central system, directly, via APP, or with an interface to any GPS source.

The use of algorithms based on scientific literature improves players' performance and prevents injuries

Resolves communication issues among club staff while simultaneously monitoring their activities.

The use of BIG DATA and the creation of benchmarks allow for the evaluation of player growth and help to achieve future goals.

A comprehensive data collection system facilitates the coordination of multiple scouts. A real-time evaluation system for the most interesting profiles helps to make strategic choices ahead of other competitors.

A dedicated medical area, compliant with UEFA standards for injury cataloguing, report archiving and post-injury treatment. Daily reports and detailed statistics, medical records and health files are considered essential.

Every clubs has different goals and targets, WeakRisk Sport Solutions meets every need with a modular tool

Professional sports clubs need to collect and analyse data such as:

The performance of players in training and matches, the analysis of internal and external loads, and pre- and post-training methodologies for injury prevention are essential for developing increasingly advanced strategies to improve players' performance.

With access to the various modules, every member of staff with a personal profile and password can access their dedicated area.

A comprehensive data system to meet all needs, thanks to the involvement of various areas of expertise in the management of a football club.

WeakRisk Sport Solutions is a modular application. Here are some of its modules:

- Secretarial services with schedule management, medical appointment management, echocardiograms, football school fees, facility and changing room management, and an internal communication system with push notifications.
- Technical area with training and attendance management, training load, pre- and post-training, call - ups, matches, and detailed individual and team statistics. A fully dedicated technical area for goalkeepers.
- Test area for evaluating individual and team progress or for comparing players.
- Medical area with records and health management of injuries according to UEFA Elite Club Injury Study standards, therapies and medical reports. Clinical tests and blood examinations.
- Injury prevention and wellness areas, Rpe Borg and multiple methodologies for analysing internal and external loads.
- Youth football area, with assessment forms, statistics, individual and team reports. Comparative analyses between athletes in the same role or in the higher category and archiving of historical data for each category, with the creation of benchmarks.
- Injury recovery area with detailed reports on activities carried out and management of rehabilitation staff.
- Scouting area to speed up the search for the most promising profiles using a function called Top Player
- Warehouse and pharmacy with loading and unloading movements and management of supply orders.
- Mobile apps for iOS and Android developed for players allowing them to send real-time updates on their physical condition, such as wellness, recovery and perceived fatigue

Secure

Data protection and daily backup .

Simple

With a limited learning curve .

Customisable

Constant updates and customisations on request, tailored to your own football philosophy and specific needs. The guarantee that the tool will perfectly meet the club's expectations and provide the best possible support for staff and athletes.

Scientific

Innovative IT solutions, using only scientific bibliography sources.

Communicative

The used of a centralized system provides the answers you are a looking for in real time. Monitoring the work of each area is immediate and improves communication, creating synergy within the team.

Private

Access for each employee via specific credentials, in compliance with privacy regulations, with access only to their own area of competence.

Integrate staff

Examples of professional teams that have been at the top of European leagues for years demonstrate the importance of a system that allows data from each category to be stored, creating benchmarks for reference.

APP where players can independently send data such as WellnessRPE BORG, GQR, TIA and sleep analysis, reducing the margin for error and the workload of the athletic trainer

SPORT SOLUTIONS PRO - The choice of professional clubs

Key features:

- Cloud server with backup
- Customisations on request and API integrations
- Unlimited teams and users
- Apps for players on iOS and Android included
- Dedicated training and priority support
- Three-year licence with annual payment

Strategic value:

- Centralisation of all areas (administrative, technical, medical, performance)
- Predictive algorithms
- Fully scalable and customisable environment
- Ideal for clubs that want a high organisational level and full decision-making control.

Benefits of WeakRisk Solutions Academy for main club

- Increased loyalty among affiliated clubs thanks to the offer of a product used by professional clubs that would otherwise be unable to afford it;
- Increase in affiliated clubs due to the attractiveness of the offer, both technically and economically;
- Online monitoring of activities and tests for each individual athlete in each affiliated club, if relevant;
- Opportunities to discover new talent early on;
- Centralised scouting management;

Perfect for standardising methodology, language and monitoring between the first team and the youth sector.

By WeakRisk, you gain access to an advanced organisational model, benefiting from professional tools.

Through a training programme, you will be able to manage your company in a scientific and technological manner.

Benefits of WeakRisk Solutions Academy for affiliates clubs

- Availability of a professional tool at no cost;
- Improvement of the day-to-day management of the club;
- Increased competence for technical staff;
- Economic benefits from discovering new talent;
- Differentiated and innovative sponsorship offer;
- Financial return from sponsors for banners on athletes' apps

Why choose us?

For our professionalism, because our collaborations with professional teams, which have been at the top of European leagues for years, have helped us to develop a comprehensive system that allows for the storage of data for every category, whether first team or youth sector. For the careful monitoring of various issues, such as those related to injuries, which are one of the most pressing problems.

For our analytical methodology, to better understand the elements that influence a sporting outcome, to stay ahead of the curve with strategic choices, offering an advantage over all other clubs. In particular for the youth sector, a special player evaluation system with immediate comparison to the higher category to facilitate future choices.

In-sourcing and out-sourcing WeakRisk employs the best consultants

Research

Athletic trainers, coaches, doctors and scouting managers from professional Italian football teams collaborate with us and actively participate in improving the tool.

Development team

Our development team consists of IT developers, analysts, coordinators or project managers.

WeakRisk Sport Solutions integrates models and principles from scientific literature, transforming them into immediate operational tools. The system automates data collection, supports data management and catalogues injuries according to UEFA Elite Club Injury Study criteria, producing reports and reducing time and errors.

The screenshots illustrate the software's capabilities in monitoring player health and injury risk. Key features include:

- A/C/WI Ratio Monitoring:** A line chart showing the ratio over time for various players, with a legend for different injury types like ACL, CCL, and Ligamentum.
- Injury Risk Index:** A bar chart and table showing risk levels for different injury types, such as ACL, CCL, Ligamentum, and others.
- UEFA Injury Card:** A detailed form for recording injuries, including player details, location of injury, injury type, classification, and mechanisms.
- Player Performance and Injury Data:** A table showing player statistics and injury data, with a color-coded risk index.
- Weekly Injury Reports:** A table showing weekly injury data, including goals, total minutes, and injury counts.

A commercial proposal tailored to the needs of the sports club.

- Licence with unlimited access for teams, players and technical staff.
- Cloud infrastructure.
- Training.
- Customer support.
- Dedicated server.
- Customisation options.

Three - years licence duration
